

Evermetal

Roof Restoration System

Restore and Pocket the Savings

A properly installed Elastomeric Coating System is a proven and cost effective way to rapidly restore a leaky metal roof. The Evermetal system provides a long term solution without a costly tear off.

Performance

Watertight	Addresses all sources of roof leaks by sealing all seams and fasteners.
Durable	Resistant to damage from roof traffic and storm damage.
UV Resistant	Unlike traditional roofing systems, an Evermetal system has a surface that is designed for even the harshest UV conditions.
High Reflectivity and Emissivity	Nearly 85% of all UV light is reflected and the High Emissivity gives the coating the ability to release any heat that is absorbed which keeps the roof surface +/- 10 degrees from ambient temperature.
Corrosion	Everest rust inhibitive primers are designed to combat corrosion.
Disruption Free	Installation is completed without bothering building occupants.
Extends Building Life	Cool roof surface will reduce expansion and contraction stresses on your building.

Value

Energy Savings	Reduced solar heat gain will cut summer energy costs by up to 30%.
No Tear Off	Typically no costly tear off required.
Low Cost	An Evermetal system keeps more money in your pocket compared to replacement systems.
Low Life Cycle Cost	With no tear-off and by simply maintaining the protective surface coating on your roof every 10-15 years, your roof can last indefinitely.
Rebates	Many local and federal rebates are available.
Tax Benefits	An Evermetal system can often be fully expensed in the year of installation.

Environment

No Tear Off	Typically no need to remove roof and fill our land-fills with roof waste.
Water-based	Non-hazardous, non-flammable and easy cleanup.
Low VOC	Meets the most stringent VOC requirements in the U.S.
Low Odor	Can be installed in situations where rooftop air handlers cannot be turned off.
Sustainable	Simply maintaining the protective surface coating on your roof every 10-15 years, your roof will last indefinitely.

EVEREST SYSTEMS

Liquid Applied Solutions, From the Roof Up

Everest Systems Co.

The Evermetal restoration system can provide an excellent return on investment (ROI). Evermetal roofs can pay for themselves in as little as 7 years.

Roof surface temperatures can be reduced by as much as 75 ° F!!!

Long Term Performance

Year after year 100% Acrylic elastomeric coatings have captured the majority of the Metal roof restoration market in the US. Their long term durability and excellent waterproofing performance have made them the go to solution for a leaky metal roof. Everest Systems has optimized the technology and offers one of the highest quality systems available in the market place today.

Process

Below is the multistep process to seal and protect your roof:

1. Tighten or replace all loose fasteners. Replace panels that no longer have structural integrity.
2. Power-Wash the roof to remove all contaminants including dirt and loose rust.
3. If necessary, prime with Everprime Metal to prevent further corrosion.
4. Apply EverSeal to completely seal all fasteners, seams, and penetrations.
5. Apply basecoat and topcoat of Evercoat™ Elastomeric coatings.

Evermetal Restoration Products

Everest Systems manufactures a full range of high performance, cost effective and environmentally friendly products.

Everprime Metal • Water based rust inhibitive Low VOC primer formulated with corrosion inhibiting pigments • Exceptional adhesion to metal substrates

EverSeal • 100% Solids • Extremely tough and flexible Siliconized Polyurethane sealant Used for all fasteners and penetrations
NO FABRIC REQUIRED!!

Evercoat EC • Very durable • 100% Acrylic Excellent UV protection • Highly reflective Cost-effective • Elastomeric water based Low VOC • Algae and acid rain resistant.

Evercoat HT • High Performance • 100% Acrylic • Exceptional tensile and elongation properties • Maximum reflectivity retention Highest UV protection • Water based • Low VOC Algae and acid rain resistant.
